Civil Case No. 4:21-cv-00923

**AFFIDAVIT OF LAUREN MILLER IN SUPPORT OF PLAINTIFF'S MOTION  
FOR TEMPORARY RESTRAINING ORDER AND PRELIMINARY INJUNCTION**

STATE OF TEXAS                    )  
  )  
COUNTY OF DALLAS            )

Lauren T. Miller, the Affiant, having been duly sworn, states upon oath:

1. My name is Lauren T. Miller. I am over the age of eighteen (18) years and am fully competent to make this affidavit.
2. The statements in this affidavit are true and correct. The statements are based on my personal knowledge and my review of the business records of A-76 Technologies, Inc. ("A-76") pertaining to this matter that are described below. I am the CEO and an authorized representative of A-76 and make these statements on its behalf. I am also the custodian of A-76's business records.
3. It is the ordinary course of business for A-76 to maintain records regarding its intellectual property rights, publications, and websites, which records are made at or near the time of the acts, transactions, occurrences, and events reflected in the records, by – or from information transmitted by – someone with knowledge of such acts, transactions, occurrences, and events. These records are kept in the course of A-76's regularly conducted business activity and making the records are a regular practice of that activity. A-76's records regarding its intellectual property rights and website are part of its business records. As described more fully below, the items that accompany A-76's Motion for Temporary Restraining Order and Preliminary Injunction as Exhibits 1 through 32 are part of those business records.
4. I have read A-76's Original Complaint and verify that all factual statements in A-76's Original Complaint are true and correct.

{00293362.DOCX}

5. Attached as Exhibit 1 is a true and correct copy of A-76's Certificate of Registration (United States Patent and Trademark Office Registration No. 5,183,475) for its "Rust Patrol" trademark.
6. Attached as Exhibit 2 is a true and correct copy of A-76's Certificate of Registration (United States Patent and Trademark Office Registration No. 5,297,872) for its "Resisting Arrust" trademark.
7. Attached as Exhibit 3 is a true and correct copy of Defendant Mass Management, LLC's ("Mass") rust-patrol.com website homepage.
8. Attached as Exhibit 4 is a true and correct copy of A-76's rustpatrol.com website homepage, originally published on August 11, 2017.

27. Attached as Exhibit 23 is a true and correct copy of A-76's rustpatrol.com website "Cart" page, originally published on August 11, 2017.
28. Attached as Exhibit 24 is a true and correct copy of A-76's rustpatrol.com website "Case Studies" page, originally published on August 11, 2017.
29. Attached as Exhibit 25 is a true and correct copy of A-76's rustpatrol.com website "Checkout" page, originally published on August 11, 2017.
30. Attached as Exhibit 26 is a true and correct copy of A-76's rustpatrol.com website "Contact Us" page, originally published on August 11, 2017.
31. Attached as Exhibit 27 is a true and correct copy of A-76's rustpatrol.com website "Corrosion Calamities" page, originally published on August 11, 2017.
32. Attached as Exhibit 28 is a true and correct copy of A-76's rustpatrol.com website "Media Packet" page, originally published on August 11, 2017.
33. Attached as Exhibit 29 is a true and correct copy of A-76's rustpatrol.com website "Preserve Protect" page, originally published on August 11, 2017.
34. Attached as Exhibit 30 is a true and correct copy of A-76's rustpatrol.com website "Submit A Story" page, originally published on August 11, 2017.

35. Attached as Exhibit 31 is a true and correct copy of A-76's rustpatrol.com website "Sustainability" page, originally published on August 11, 2017.
36. Attached as Exhibit 32 is a true and correct copy of A-76's rustpatrol.com website "The Scanner" page, originally published on August 11, 2017.
37. Attached as Exhibit 33 is a true and correct copy of Mass's mass-management.com website using A-76's "Rust Patrol" trademark.
38. It is my belief and understanding that Mass began using A-76's trademarks sometime in 2020.
39. It is also my belief and understanding that Mass began using an almost identical version of A-76's website sometime in late 2020.
40. Through counsel, A-76 sent a letter to Mass demanding it stop using all of A-76's trademarks and website materials. Mass took down the copied website materials for some time, but re-published it sometime in early 2021. The attached Exhibits referencing Mass's website refer to Mass's most recently published website.

**REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION**

**WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.**

**Requirements in the First Ten Years\***

**What and When to File:**

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.\* See 15 U.S.C. §1059.

**Requirements in Successive Ten-Year Periods\***

**What and When to File:**

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.\*

**Grace Period Filings\***

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

**\*ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

**NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.**

**NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.**

### *The technology behind Rust Patrol.*

Rust Patrol uses nanotechnology to prevent rust, lubricate, penetrate, and displace moisture. Created by one of the top ten chemists in the world and made right here in the USA, you will be astounded by Rust Patrol's performance.

Through surface active moieties that physisorb to the oxide layer, Rust Patrol forms a bond deep in the grains of the metal at the molecular level, creating a barrier that provides outstanding, long-lasting protection.

An active product that doesn't wear off easily and provides more complete coverage, will protect and lubricate your heavy equipment, nuts, bolts, and everything in-between.

## Cut Cleaning Time in Half

Rust Patrol is an extremely effective tool for cleaning your firearms. We suggest Multi-Purpose as it penetrates the powder and fouling, cutting cleaning times in half, especially for shotguns and rimfire guns. It will protect your firearms from corrosion and lubricate the slide action and rails. It will also greatly lengthen the time between cleanings and eliminate mechanical malfunctions like stove pipes and double feeds. And it won't harm the bluing of your antiques. We recommend using Rust Patrol Lubricating Oil (No VOCs) for adding luster to the wood on your stock or grip.

## Protecting Anything Automotive

Rust Patrol is great for protecting anything automotive. From cars, pickups, or motorcycles to a fleet of vehicles or trucks, be sure to spray your hinges, locks, and latches. It won't collect dirt and dust, keeping parts clean. It's easy to apply with our 2 oz pump spray or 7 oz aerosol (with a dual-action straw). When protecting a large number of vehicles, Rust Patrol can save you thousands of dollars a year in cost of ownership. It will actively seek out the metal and move through dirt, grit, and grime, forming a long-lasting protective barrier.

## Automotive Applications for Rust Patrol:

- Ball joints
- Battery terminals
- Bolts
- Chrome: bumpers & wheels
- Connectors
- Cotter pins
- Hitches
- Hinges
- Locks
- Nuts
- Screws
- Seat rails
- Trailers
- U-Joints
- Wiring harnesses

You can use Rust Patrol Heavy Duty to winterize and protect the undercarriage of your vehicle, or to coat snow plow blades to keep the snow from sticking. It's also great for the hydraulics that operate these blades.

## Applications for Rust Patrol on Construction Equipment

Heavy equipment was made for Rust Patrol. With thousands of places where you can apply it, Rust Patrol will save you time and money by keeping your investment working. Protection and lubrication are the two main keys to the life of your equipment. Downtime due to breakage, costly repairs, outright replacement costs, not to mention the time and cost of labor will eat away at your bottom line. Rust Patrol is the answer to these problems of cost of ownership.

Rust Patrol is easy to apply. You can spray, dip, or brush it. It won't collect dirt, grit, and grime, keeping your equipment clean. Rust Patrol lasts 4-5 times longer than the closest competitor. It will protect, lubricate, act as a penetrating oil, and displace moisture on electronics, keeping your equipment in top operating condition.

## Extend the Life of Your Bicycle With Rust Patrol

When you want to repair and extend the life of your bicycle use Rust Patrol. After testing Rust Patrol, professional bicycle mechanics were impressed and preferred to use Rust Patrol for all their lubrication needs, as well as to free nuts and bolts.

[Shop Now](#)

**RUST PATROL**

## Cycling Uses for Rust Patrol:

- Bolts
- Brake cables
- Chain
- Connections
- Gears
- Nuts
- Pad locks
- Screws
- Shifters
- Sprockets

Rust Patrol is great to lube your bicycle chain. It penetrates the small rollers and gives them the lubrication they need without being too heavy or tacky. The result is the chain does not rust or attract dirt like the other lubricants. It even keeps snow from sticking to your gears and chain.

## Reduce Downtime & Breakage

Without a doubt, Rust Patrol can save you thousands of dollars every year by protecting parts and assemblies from corrosion and providing proper lubrication. Made for high salinity, high humidity, harsh environments, Rust Patrol will lengthen the time between maintenance cycles, and severely reduce downtime due to breakage and repairs. Lasting 4-5 times longer than the closest competition, it will stop corrosion and lubricate your equipment to keep it in top working condition. And at 1,000 square feet per gallon of Heavy Duty, a little goes a long way.

## Energy Uses for Rust Patrol:

- Actuators
- Battery terminals and connectors
- Blades
- Chains
- Drill bits
- Electrical components
- Electrical panels
- Pipe threads and couplings
- Heat exchanger tubing
- Hinges
- Hydraulic cylinders
- Hydraulic pumps
- Latches
- Locks
- Parts in storage
- Pulleys
- Tools
- Valves
- Wireline and braided cables
- Wiring harnesses

"I personally want to share this feedback and our experience at Baker Hughes with the rest of the world to inspire everyone in the oil & gas sector in the use of Rust Patrol not just as a mere lubricant.

Friction & wear in dynamic part is the core reason for energy loss in our system, like oil tools and major moving equipment in the workshop and this can be controlled by using this high-performance lubricant. On a scale to 1-10, i would always rate Rust Patrol a 10 and I hope this product would be readily available on a regular operations request.

Thanks for giving Baker Hughes an opportunity to

## HEAVY DUTY

[HOME](#) [SHOP ALL](#) [HEAVY DUTY](#)

Rust Patrol Heavy Duty, is the advanced, industrial formula, providing up to two years of rust prevention. It actively lubricates, penetrates, and displaces moisture protecting electronics. If protection is what you're after, Heavy Duty is the product you need. Use it on your equipment, the undercarriage of your vehicle, hydraulics, and parts in storage. Thousands of applications - especially in harsh environments. Rust Patrol Heavy Duty uses nanotechnology to outperform other products across the market, and whether at home or on the job, Rust Patrol Heavy Duty is the product to get the job done right the first time!

## **EXHIBIT 8**

## **EXHIBIT 9**

THEN AND NOW

# Manufacturing, Warehousing, Sales, and Distribution Services

Mass Management's roots are firmly planted in the hardware retail, home center, and paint chain market segments. In 1986 David McGinnis started his own manufacturing representative agency, McGinnis & Associates. A few years later he started a sister company, McGinnis & Associates Sales and Service, which provided service for manufacturers to Lowe's. Eventually, this led to helping manufacturers by managing sales and marketing at a national level.

Between 2016 and 2019 McGinnis & Associates Sales and Service transitioned to the manufacturing side becoming Mass Management, LLC and is now located in Fort Mill, SC. We currently handle the manufacturing, warehousing, sales, and distribution of the brands Rust Patrol and Mountain Mike's Remedies. Directly working with the inventors, we ship our products worldwide into over 15 countries.

## David McGinnis – CEO

In 1971, David McGinnis started at DAP Products, Inc. as a sales trainee and was quickly promoted through the ranks to General Sales Manager. After eleven years with the company, he became Vice President of sales for Manco Tape Company, Inc. Later in 1986, he started his own rep agency, McGinnis & Associates, and grew it to cover fourteen states employing 32 sales representatives. With over 49 years of experience, David now presides over Mass Management, LLC as CEO.

## Michael McGinnis – President

Michael McGinnis grew up under his father's tutelage learning the family business. Attending trade shows and making sales calls through college, he learned all aspects of sales and service, making people and relationships a primary focus. In 2016, Michael McGinnis went to work for David as Vice President of sales for McGinnis and Associates, and became President of Mass Management, LLC in 2019.

## Paula Holmes – Office Administrator

Paula Holmes went to work with McGinnis & Associates in 2010, entering invoices, reconciling commissions, and general office duties. Coordinating show programs between the manufacturer and the distributor gave her a good grounding for her future with Mass Management. Continuing these tasks, along with so much more, Paula is an integral part of our operations.

WHO 西アフリカ

## A BIT ABOUT US

A 16 Technology was started in 1999 by former University of Illinois and IBM alumni who were students at the University of Illinois Graduate School of Business. They took a class that would change the course of their lives. In the Technology Designing course, they were in a class packed with developing a business plan for a series of joint-venture meetings were held and a meeting by Dr. James Dine, a renowned faculty member with 200+ patents filed and who was named by R&D Magazine, "one of the 100" in 2003.

During the morning of 14 June, Moore and Jaiswal worked with other team members to develop a business and investment plan for the *Global 500*. After winning a business plan competition at the University, Moore was invited to become a business plan competition juror around the world. At the Rio Business Plan Competition, the largest and best-run business plan competition in the world, a top technology team scored first and almost 10 minutes before noon. More than even the organizers could

## HISTORY

The technology behind *Atom* was created by chemistry professor Dr. Daniel T. Frenkel, who has pioneered a new synthesis strategy called *Atom* and the company was formally launched in April 2014. The company's 4.5% trademark and its technology have been licensed numerous universities, such as Harvard, in the United States. The *Atom* technology is also being used by other companies, such as *Atom* and *Atom*.

## **EXHIBIT 11**

## OUR STORY

**WE ARE NIMBLE AND ABLE TO QUICKLY ADAPT TO THE NEEDS OF THE MARKET IN ORDER TO SOLVE THE PROBLEMS OF OUR CUSTOMERS.**

Headquartered in Houston, Texas, A-76 is able to serve global companies as well as a wide range of Industries including energy, marine, manufacturing, and more. All A-76 testing has been validated through third parties giving our customers the confidence that they need when using our products. A-76 taps into our network and resources to offer the best solutions to our customers. The A-76 corporate board provides us with the industry wisdom and experience to push A-76 into the technological forefront of the corrosion prevention and lubrication industries.

## MISSION

A-76 Technologies manufactures and sells high-performance, multi-purpose preservation coatings and lubricants that help our customers to reduce their costs of corrosion. A-76 Technologies protects metals for longer than competitors and also in extreme environments where competitors cannot operate, thus helping to solve the multi-billion dollar problem of corrosion. Company Mission and about the company here

## VISION

Consistently provide high quality and superior solutions to solve our customer's corrosion inhibiting and lubricating needs.

## CORE VALUES

### INTEGRITY

Integrity is the cornerstone of the A-76 Technologies values. It is key that we have trust between our customers, employees, and vendors. At A-76, we believe in doing what is right by being honest and forthcoming through open communication. Personal integrity drives professional integrity and A-76 strives to stand apart as a name that all of our partners can trust.

### QUALITY

At A-76 Technologies, we take pride in what we produce and sell. Quality drives customer satisfaction, economic value, and personal satisfaction for employees from selling a product worth having.

### EMPLOYEE SATISFACTION

Happy employees give us happy customers. A-76 Technologies employees are seen as ambassadors of the company. We believe that serving our employees' needs first allows them to better serve the needs of our customers and our vendors.

### SOLVE CUSTOMER NEEDS

At A-76 Technologies, we believe that we can best solve customer needs through integrity, open communication, quality products, and a satisfied employee with whom to interface. A-76 serves as a solution for a wide variety of needs. Continuing to solve these customer needs will allow A-76 to focus its growth by maintaining its focus on what we can do to help our customers.

## RUST PATROL

Fight rust, lubricate, and free rusted parts like never before with RUST PATROL™. With a range of uses, you can depend on RUST PATROL™ at home or on the job to keep equipment in good condition and parts running smoothly so you can stop spending time and money on repairs, maintenance, and

## The Technology Behind Rust Patrol

# Nanotechnology Takes on Rust

Rust Patrol was invented in Houston, TX by Dr. James Tour, a preeminent scientist in the field of nanotechnology. Rust Patrol uses nanotechnology to work better, faster, and longer than any other thin-film temporary coating on the market. Actively seeking metal like a magnet, Rust Patrol forms a bond at the molecular level, giving more complete coverage. It's tenacious — it doesn't wear off easily.

We're 100% USA-made, sourcing our chemicals, cans, bottles, labels, blending, all of it, right here in the United States. From our warehouse in Fort Mill, SC, we ship product all over the

## **EXHIBIT 13**

**IF YOU HAVE A QUESTION THAT WE HAVE NOT ADDRESSED HERE OR IF YOU WOULD LIKE ANY MORE DETAILS, PLEASE CONTACT US AT [SALES@A76TECH.COM](mailto:SALES@A76TECH.COM).**

## GENERAL

*What does "A-76" stand for?*

The inventor came up with the name "A-76" - it actually doesn't stand for anything. Years ago he saw a speech by Jeff Bezos who said that he chose "Amazon" because it's at the front of the alphabet so you always get listed first. As such "A" gets it at the top of most lists. "76" is an easy number for Amazonians to remember (7-6), hence the "76".

*What else can A-76 do besides prevent rust?*

A-76 also works as a lubricant, water displacer, and a penetrant.

*On what metals does A-76 work?*

A-76 prevents corrosion on a wide range of metals including, but not limited to: copper, nickel, aluminum, steel, magnesium, zinc, and more!

*How do I buy A-76?*

Industrial users can contact their preferred distributor. Household users can purchase A-76 on [Amazon](https://www.amazon.com).

*What is the lead time for an order?*

Based on stock, projections and current inventory, an order should be filled immediately. If a production run is required, an order can be filled in approximately 20-30 days.

## PRODUCT

*What is in A-76?*

Sorry our ops are sealed! A-76 is protected by trade secret, rather than a patent. It is so secret that even the CEO does not know the formulation or process to manufacture A-76.

*How does A-76 work?*

A-76 coats the treated surface to prevent oxidation.

*How does it cling to a surface?*

Surface active molecules that physiorb to the oxide layer that are on all metals that have been exposed to air. In more simple terms, A-76 coatings are attracted to the metal surface and create a strong bond.

*What kind of barrier does it form?*

A-76 forms a multi-molecular layer. The film thickness is likely greater than to disburse upon a dip coat, so is 10,000x thicker than the 1 monolayer thickness of a self-assembled monolayer. In coating terms, it is approximately a 4-10 mil film as compared to most thinner epoxy coatings that are 5-6 mils thick. Thus, A-76 is approximately 10 times thinner than a standard epoxy.

*How long does A-76 last?*

Depending on external conditions, A-76 Super can prevent rust from forming for up to 1 year outside. A-76 Green is approximately 85-90% as long lasting as Super (depending on environment). If A-76 is being used in an application with considerable wear and tear, more frequent application is recommended. A-76 products can last even longer when protecting equipment stored in a covered area or warehouse.

*Does weather impact performance?*

Yes, eventually heavy pouring rain will wear down the A-76 coating on the surface of the metal. When there is regular, extreme weather, more frequent application is recommended.

*Does A-76 have future plans for new products?*

Yes, we have a longer term version we hope to bring to market in the near future.

## APPLICATION

*Can you paint over a surface that has been coated with A-76?*

For best results, we recommend removing A-76 first. A-76 is attracted to metal surfaces, so your paint would not be able to penetrate the A-76 barrier in order to adhere to the metal surface.

*Is it safe to use A-76 on electrical parts?*

Yes, all A-76 products can be used to coat electrical components. One variation, A-76 Electronics, is specially designed to prevent corrosion on electronic parts.

*Is A-76 an anti-seize product?*

A-76 products are oils rather than greases and thus are not ideal for anti-seize applications. However, A-76 is compatible with other lubricating oils.

*Is A-76 compatible with rubber?*

We are in the process of testing, however, we believe that it is.

## PRODUCT DISPOSAL

*Is A-76 biodegradable?*

No, it should be contained during application and removal.

*How do I dispose of excess A-76 products?*

Users should comply with federal, state and local laws regarding disposal. If washing A-76 off outside, prevent the waste water from entering the storm drains and exiting the site. Please speak to your A-76 representative for further guidance and detailed instructions.

## ENVIRONMENT

*What is the impact of A-76 on the environment?*

A-76 does have some environmental impact, like any similar product. All A-76 products are non-toxic and we offer a Green Variation with no volatile organic compounds (or VOCs), helping companies to reduce their air emissions.

*Is A-76 compliant with the Montreal Protocol?*

Yes, A-76 products are CFC-free.

*Do any A-76 products violate California Prop 65?*

No, A-76 products are non-carcinogenic and are not known to create pregnancy problems.

*Does A-76 contain any zinc, heavy metals, or silicone?*

No, A-76 products do not contain any zinc, heavy metals, or silicone.

*What about any other harmful chemicals?*

A-76 does not contain any phenols, PCBs, arsenic, or TCDDs.

[Home](#) / [Resources](#) / **FAQs**

## Rust Patrol FAQs

### How does Rust Patrol work?

Surface active moieties that physisorb to the oxide layer. In more simple terms, Rust Patrol is attracted to the metal surface & creates a strong bond.

### What kind of barrier is formed?

Rust Patrol forms a multi-molecular layer. The film thickness is likely greater than 10 microns upon a dip-coat, so 10,000 times thicker than the 1 nanometer thickness of a self-assembled monolayer. In coating terms, it is approximately a 0.4-0.5 mil film as compared to most thinner epoxy coatings that are 5-6 mils thick. Thus, Rust Patrol is approximately 12 times thinner than a standard epoxy.

### On what kind of metals does Rust Patrol work?

Depending on external conditions, Rust Patrol can prevent rust from forming for up to 3 months outside. Rust Patrol Lubricating Oil lasts approximately 85-90% as long as Multi-Purpose (depending on environment). If Rust Patrol is being used in an application with considerable wear and tear, more frequent

---

## Does weather affect the performance?

Yes, eventually heavy, pounding rain will wear down the Rust Patrol coating on the surface of the metal. Where there is regular, extreme weather, more frequent application is recommended.

---

## Can you paint over a surface that has been coated with Rust Patrol?

For best results, we recommend removing Rust Patrol first. Rust Patrol is attracted to metal surfaces, so your paint would not be able to penetrate the Rust Patrol barrier in order to adhere to the metal surface. We do suggest applying Rust Patrol over paint to use as a sacrificial coating. This works well, particularly at weld points.

---

## Is it safe to use Rust Patrol on electrical parts?

Yes, all Rust Patrol products can be used to coat electrical components.

---

## Is Rust Patrol an anti-seize product?

Rust Patrol products are oils rather than greases and thus are not ideal for anti-seize applications.

---

## Is Rust Patrol compatible with rubber?

It depends on the type of rubber. Test with a sample first to be sure. Higher quality rubbers are less likely to be affected by Rust Patrol.

---

## What is the impact of Rust Patrol on the environment?

Rust Patrol does have some environmental impact, like any similar product. All Rust Patrol products are non-toxic and we offer a variation with no volatile

RUST PATROL

---

## Do any Rust Patrol products violate California Prop 65?

No. Rust Patrol products are non-carcinogenic and are not known to create any problems with pregnancy.

---

## Does Rust Patrol contain any zinc, heavy metals, or silicone?

No. Rust Patrol products do not contain any zinc, heavy metals, or silicone.

---

## What about any other harmful chemicals?

Rust Patrol does not contain any phenols, PCs, PCBs, arsenic, or TCDDs.

---

## Is Rust Patrol biodegradable?

No, it should be contained during application & removal.

---

## How do I dispose of excess Rust Patrol products?

- Users should comply with federal, state, and local laws regarding disposal.
- If washing Rust Patrol off outside, prevent wastewater from entering storm drains and exiting the site.
- Example: Put a boom around the storm drain and wash area or using tarps to prevent the material from soaking into the ground. The wastewater can be suctioned into a tote and removed by a waste company.
- If washing Rust Patrol off inside, follow the same procedure for any drains inside the building.
- If users get permission from their sanitary sewer provider, they may be allowed to clean inside.
- Many industrial sites require a storm water permit. If they have not used preventative measures, the runoff could contaminate their samples, which can be a violation.

## A-76 Technologies Fact Sheet

### COMPANY DESCRIPTION:

A-76 Technologies is an anti-corrosion coatings and lubricants company selling a variety of solutions. The A-76 line of products include A-76 Super, A-76 Green, A-76 Light, and A-76 Electronics.

The full line of A-76 preservation coatings work to prevent corrosion, saving time and money while reducing safety risks. A-76's efficacy in high-salinity, high-humidity, and extreme temperature environments make it a single solution for multiple needs.

A-76 works on a variety of metals, including aluminum, nickel, copper, and oilfield steel. As such, A-76 can be applied to a variety of metals and multi-metal components. A-76's minimal drying time (five minutes or less) means that it can be used almost immediately, reducing drying time and getting equipment back into action more quickly.

All A-76 Products are Montreal Protocol compliant and are compliant with California Proposition 65. A-76 brands include a version with no volatile organic compounds (VOCs) and a version that is electronic-safe.

### CLIENTS AND POTENTIAL CLIENTS:

Private industry (including players in the oil and gas, energy, transportation, marine, and aerospace industries), government, and household consumers.

### HEADQUARTERS:

410 Pierce Street, Suite 223,

### HISTORY:

The technology behind A-76 was invented by Dr. James Tou, a chemistry professor at Rice University. The business commercialization strategy started in Fall 2013 and the company was formally launched in April 2014. Since inception, the A-76 Technologies team has received numerous accolades at business plan competitions, such as being named the "Most Innovative Energy Start-Up." A-76 Technologies closed on a Series A round of venture capital financing in December 2014.

## The difference between customer satisfaction and customer success:

Customer satisfaction is not enough. A-76 Technologies aims for customer success. Going beyond achieving customer satisfaction ensures we have a thorough understanding of customer needs and requirements. By setting quality objectives, implementing an effective quality management system, and striving for continuous improvement in our products and services, we help our customers be successful.

OUR BRANDS

# Superior Quality and Value

High-quality products manufactured to meet the needs of industry and the consumer

Rust Patrol is a revolutionary line of thin film preservation coatings for protection, penetration, lubrication, and water displacement. Offering superior protection and ease of maintenance, Rust Patrol will keep your equipment at peak performance in high humidity, high salinity environments. Active at the molecular level, Rust Patrol saves you time and money by working more quickly, lasting longer, and with less product.

[Learn more »](#)

Mountain Mike's Remedies is a product line for home, work, and play. Using natural ingredients, our products are designed for the health and comfort of your skin. They'll get you back to your activities in a natural way without using harsh, irritating chemicals. From sting ointments to lip balms, Mountain Mike's Remedies cares about you and your family.

## LOOKING FOR AN EXCITING CAREER OPPORTUNITY? JOIN THE A-TEAM!

Are you looking for an opportunity to join a growing company and to see your efforts have a direct impact? Come make a difference at A-76. To apply for a position with A-76 Technologies, send your resume to [careers@a76tech.com](mailto:careers@a76tech.com).

### BUSINESS DEVELOPMENT MANAGER

#### ROLE

The Business Development Manager works to improve A-76 Technologies' market position and to achieve financial growth. S/he defines long-term sales strategic goals, build key client relationships, identify business opportunities, negotiate and close business deals, and maintain extensive knowledge of current market conditions. As a salaried plus commission, senior sales position within A-76 Technologies, s/he will work with the internal team, marketing, and other managers to increase sales opportunities and thereby maximize revenue for the company. To achieve this, s/he will find potential new clients, present to them, ultimately convert them into clients, and continue to grow business in the future. S/he will also help to manage existing clients and ensure that they stay satisfied and positive. As required, s/he will make presentations on solutions and services that meet or predict the future needs of A-76's clients.

#### JOB DESCRIPTION

The primary role of the Business Development Manager is to prospect for new clients by networking, cold calling, advertising, and/or other means of generating interest from potential clients. S/he will plan persuasive approaches and pitches that will convince potential clients to do business with A-76 Technologies. S/he will develop a rapport with new clients, set targets for sales, and provide support that will continually improve relationships. S/he will grow and retain existing accounts by presenting new solutions and services to clients. S/he will work side by side with mid and senior level leadership, marketing, and technical teams. S/he will manage the activities of the sales team responsible for developing business for A-76 Technologies. S/he will participate in strategic planning key to develop the pipeline of new business coming in to the company. This effort will require a thorough knowledge of the market, the solutions/services A-76 Technologies can provide, and the company's competitors. The main duties of the Business Development Manager are summarized as follows:

### MARKETING SPECIALIST

### Susan Industry: Household

#### BACKGROUND

During a recent trip to a local hardware store, Susan discovered a small bottle of Rust Patrol Rust Passant. She was intrigued by the product and decided to try it on her own.

#### GOAL

Susan wanted to see if the product would work on her own. She was looking for a way to prevent rust on her own.

#### SOLUTION & RESULTS

After using Rust Patrol Rust Passant, Susan was able to prevent rust on her own. She was able to prevent rust on her own.

### Jose Industry: Industrial

#### BACKGROUND

Jose was looking for a way to prevent rust on his own. He was looking for a way to prevent rust on his own.

#### GOAL

Jose wanted to see if the product would work on his own. He was looking for a way to prevent rust on his own.

#### SOLUTION & RESULTS

After using Rust Patrol Rust Passant, Jose was able to prevent rust on his own. He was able to prevent rust on his own.

### Bill Industry: Antiques

#### BACKGROUND

Bill was looking for a way to prevent rust on his own. He was looking for a way to prevent rust on his own.

#### GOAL

Bill wanted to see if the product would work on his own. He was looking for a way to prevent rust on his own.

#### SOLUTION & RESULTS

After using Rust Patrol Rust Passant, Bill was able to prevent rust on his own. He was able to prevent rust on his own.

### Paula Industry: Household

#### BACKGROUND

Paula was looking for a way to prevent rust on her own. She was looking for a way to prevent rust on her own.

#### GOAL

Paula wanted to see if the product would work on her own. She was looking for a way to prevent rust on her own.

#### SOLUTION & RESULTS

After using Rust Patrol Rust Passant, Paula was able to prevent rust on her own. She was able to prevent rust on her own.

### Taylor Industry: Transportation

#### BACKGROUND

Taylor was looking for a way to prevent rust on his own. He was looking for a way to prevent rust on his own.

#### GOAL

Taylor wanted to see if the product would work on his own. He was looking for a way to prevent rust on his own.

#### SOLUTION & RESULTS

After using Rust Patrol Rust Passant, Taylor was able to prevent rust on his own. He was able to prevent rust on his own.

### Woody Industry: Maritime

#### BACKGROUND

Woody was looking for a way to prevent rust on his own. He was looking for a way to prevent rust on his own.

#### GOAL

Woody wanted to see if the product would work on his own. He was looking for a way to prevent rust on his own.

#### SOLUTION & RESULTS

After using Rust Patrol Rust Passant, Woody was able to prevent rust on his own. He was able to prevent rust on his own.

## **EXHIBIT 27**

## PA Pipeline Explosion (Failure at Welds)

Subject: A pipeline explosion in Pennsylvania caused by a weld failure.

Importance: A major pipeline explosion caused by a weld failure.

### Other info to investigate:

- Investigate the pipeline's history, including its age, design, and previous incidents.
- Examine the welding process used to create the weld, including the welder's qualifications and the welding equipment used.
- Investigate the pipeline's operating conditions, including the pressure, temperature, and flow rate, and determine if any of these factors contributed to the failure.
- Examine the pipeline's maintenance records, including any inspections, repairs, and testing, and determine if any of these factors contributed to the failure.

### Design assessment:

- Examine the pipeline's design, including its material, thickness, and welding, and determine if any of these factors contributed to the failure.
- Examine the pipeline's operating conditions, including the pressure, temperature, and flow rate, and determine if any of these factors contributed to the failure.
- Examine the pipeline's maintenance records, including any inspections, repairs, and testing, and determine if any of these factors contributed to the failure.

### Next steps:

- Investigate the pipeline's history, including its age, design, and previous incidents.
- Examine the welding process used to create the weld, including the welder's qualifications and the welding equipment used.
- Investigate the pipeline's operating conditions, including the pressure, temperature, and flow rate, and determine if any of these factors contributed to the failure.
- Examine the pipeline's maintenance records, including any inspections, repairs, and testing, and determine if any of these factors contributed to the failure.

## Major Corrosion Catastrophes in History

Subject: The history of major corrosion catastrophes in history.

Importance: Corrosion is a major cause of failure in many structures and equipment.

### Other info to investigate:

- Review the history of corrosion.

### Design assessment:

- Review the history of corrosion.

### Next steps:

- Investigate the history of corrosion, including its causes, effects, and prevention.

## Causes of Failure of Turbines

Subject: Causes of failure of turbines.

Importance: Causes of failure of turbines.

### Other info to investigate:

- Investigate the turbine's design, including its material, thickness, and welding, and determine if any of these factors contributed to the failure.
- Examine the turbine's operating conditions, including the pressure, temperature, and flow rate, and determine if any of these factors contributed to the failure.
- Examine the turbine's maintenance records, including any inspections, repairs, and testing, and determine if any of these factors contributed to the failure.
- Investigate the turbine's history, including its age, design, and previous incidents.
- Examine the welding process used to create the weld, including the welder's qualifications and the welding equipment used.
- Investigate the turbine's operating conditions, including the pressure, temperature, and flow rate, and determine if any of these factors contributed to the failure.
- Examine the turbine's maintenance records, including any inspections, repairs, and testing, and determine if any of these factors contributed to the failure.

### Design assessment:

- Review the history of corrosion.

### Next steps:

- Investigate the history of corrosion, including its causes, effects, and prevention.

## Catastrophic Failure of a Storage Tank Due to Corrosion

Subject: Catastrophic failure of a storage tank due to corrosion.

Importance: Corrosion is a major cause of failure in many structures and equipment.

### Other info to investigate:

- Investigate the tank's design, including its material, thickness, and welding, and determine if any of these factors contributed to the failure.
- Examine the tank's operating conditions, including the pressure, temperature, and flow rate, and determine if any of these factors contributed to the failure.
- Examine the tank's maintenance records, including any inspections, repairs, and testing, and determine if any of these factors contributed to the failure.
- Investigate the tank's history, including its age, design, and previous incidents.
- Examine the welding process used to create the weld, including the welder's qualifications and the welding equipment used.
- Investigate the tank's operating conditions, including the pressure, temperature, and flow rate, and determine if any of these factors contributed to the failure.
- Examine the tank's maintenance records, including any inspections, repairs, and testing, and determine if any of these factors contributed to the failure.

### Design assessment:

- Review the history of corrosion.

### Next steps:

- Investigate the history of corrosion, including its causes, effects, and prevention.

cost per day over

## History

The technology behind Rust Patrol was invented by chemistry professor, Dr. James Tour. The business commercialization strategy started in fall 2013 and the company was formally launched in April 2014. Since inception, Tex's Squad and its leadership team have received numerous accolades, including being named on the Houston Chronicle's "Tech Start-Ups to Watch" list and Forbes 2015 "30 Under 30" list.

## How it works:

Rust Patrol's Proprietary formula coats the surface of metals with a self-assembled multi-molecular layer to prevent oxidation. Hover over the diagram to learn more.

### Surface Bonding

Adhesion to metal surface is achieved by the physical and chemical bonding of the polymer to the metal layer.

## Corrosion Inhibitor Market Segments:

### UNTREATED METAL

Temporary Coatings

### FIXED ASSETS

Cathodic Protection

Electrode Current Flow

Permanent Coatings

Paints, Powder Coats

## RUST PATROL

Eight Rust Patrol products and two Rust Patrol kits are listed below. Each Rust Patrol product is listed with its name, its application, and its benefits. For more information, please visit our website at [www.rustpatrol.com](http://www.rustpatrol.com).

## SUSTAINABILITY

### SUSTAINABILITY AT A-76: Celebrating the Environment, Diversity, and our Community

At A-76, we always keep our environmental impact at the forefront of our mind and work diligently to follow the "Responsible Care" principles, which is a voluntary initiative recognized by chemical companies across the world. Made in the United States, all A-76 products are compliant with the Montreal Protocol and do not contain any chemicals known to the State of California to cause cancer or reproductive harm.

A-76 also supports diversity and giving back to our community. A-76 is a woman and minority-led business. All of our executive team regularly engage in community service, which includes leadership roles with local non-profits as well as working with convicted felons in order to support their rehabilitation and re-entry to society.

As a chemical manufacturer, A-76 understands the potential major impact to the environment if not managed effectively. As A-76 matures and develops as a company, we always keep our environmental impact at the forefront of our mind. All A-76 products are compliant with the Montreal Protocol and California Proposition 65.

A-76 works diligently to follow the "Responsible Care" principles, which is a voluntary initiative recognized by chemical companies across the world. "Responsible Care" ensures companies make the environment, health, safety, and security top priorities in their operations. As long term goals of the "Responsible Care" initiative, A-76 seeks to be RC 14001-certified and implement a Responsible Care Management System (RCMS), which goes beyond the standards set in ISO 14001 and is recognized by the International Council of Chemical Associations (ICCA). A-76 also seeks to work with suppliers and partners who share these goals.

Corrosion not only has a significant cost impact, but also represents potential dangers and safety risks associated with structural failures across many industries. A-76 strives to be a preferred solution for decreasing risks associated with corrosion without compromising its impact on the environment. The A-76 Green product line and the company's environmental principles are such examples. By offering A-76 Green with 0% volatile organic compounds (VOCs), users can mitigate corrosion while reducing their VOC emissions.

A-76 Technologies strives to minimize our economic footprint and waste by using readily available raw materials and outsourcing initial production to established facilities.
